

We have achieved a 9% reduction in CO₂e emissions to date*

The 2010/11 carbon footprint of Aura Stationery would fill a double deck bus 215.3 times!

19,970 consumed kWh of electricity – equivalent to energy generated from 1,868 litres of crude oil

In 2009/10, the fleet of Aura Stationery drove the equivalent of 181 times the length of the M1

The average UK employee contributes approximately 4 tonnes of CO₂e emissions per year whilst at work.

* Per employee

Staff and external engagement

- Distribute specific responsibilities for environmental aspects to particular employees
- Ensure online invoicing and marketing

Data collection and management

- Assess what other company's and competitors are doing to address their carbon footprint
- Evaluate employee's personal commuting activity - encourage green options

Energy Use

- Reduce heat loss through poorly draught-proofed doors and windows
- Adopt a red card system for staff who leave monitors on when away from there desks for more than 20mins

Landfill waste

- Purchase more plastic totes for reducing packaging
- Rejuvenate your recycling system - change poster and stickers to improve awareness

Office equipment and products

- Encourage shared document usage
- Market the green credential of office paper products

We aim to save £430 in energy bills over the next year

Our carbon savings over the past year are equivalent to removing 1.5 cars from the road

We will be telling our customers and staff of our plans

You can do your bit – speak to the green team
